

The graph illustrates the divergence of five lineages over 20 generations. All lineages begin at a value of 1.0. Lineage 1 (dark green) drops to approximately 0.6 at generation 2. Lineage 2 (grey) drops to approximately 0.6 at generation 8. Lineage 3 (teal) drops to approximately 0.6 at generation 11. Lineage 4 (orange) drops to approximately 0.2 at generation 9. Lineage 5 (yellow) drops to approximately 0.1 at generation 16. After these initial drops, each lineage remains constant for the remainder of the 20 generations.
